PROFESSIONAL SUMMARY

Business Analyst and Data Analyst with 5+ years of experience translating complex business needs into actionable data solutions, from requirements gathering and data mapping through testing, deployment, and adoption. Deep experience in SQL, Python, and R; data visualization with Tableau and Power BI; and cloud data platforms across AWS, Azure, and GCP. Proven track record leading technical projects end-to-end — scope, stakeholder management, risk, and delivery — while improving data quality and decision velocity.

CORE SKILLS

Business Analysis: Requirements Elicitation, BRD/FRD/RTM, User Stories, Process Mapping (BPMN), Stakeholder Management, GAP Analysis, Agile/Scrum, SDLC

Data & SQL: Advanced SQL (CTEs, Window Functions), Dimensional & Relational Modeling, Data Profiling, Data Quality, ETL (Airflow, ADF, SSIS)

Analytics & BI: Python (Pandas, NumPy), R, Tableau, Power BI (DAX), Statistical Analysis, A/B Testing

Cloud & Databases: AWS (S3, Glue, Redshift), Azure (ADF, Synapse), GCP (BigQuery), Snowflake, SQL Server, PostgreSQL

Tools: JIRA, Confluence, Azure DevOps, Git, MS Visio

WORK EXPERIENCE

Business Analyst & Data Analyst

Molina Healthcare

Jan 2025 - Present

- Facilitated cross-functional stakeholder workshops to elicit and refine business requirements, producing BRD, FRD, SRD, and RTM artifacts with clear acceptance criteria and traceability.
- Led enterprise-wide data discovery and profiling across CRM, billing, support, and finance systems, identifying and prioritizing hundreds of data quality issues for remediation.
- Designed scalable relational (3NF) and dimensional (star/snowflake) data models in Snowflake and BigQuery, implementing conformed dimensions and reusable fact tables.
- Developed and optimized SQL, PySpark, and Spark SQL transformations for data cleansing and enrichment, achieving near-perfect data completeness.
- Partnered with Data Engineers to orchestrate pipelines using Apache Airflow, AWS Glue, and dbt, enforcing SLA adherence and observability standards.
- Designed and delivered executive-grade dashboards using Power BI and Tableau Cloud, tracking KPIs such as CAC, CLV, churn, NPS, and revenue.
- Implemented Row-Level Security (RLS) and data access matrices across BI platforms, meeting audit and compliance requirements.
- Built analytical prototypes and ML-based scoring models using Python, R, and Stata to assess customer creditworthiness and quantify financial risk.

Tools & Technologies: SQL Server, PostgreSQL, Snowflake, Spark, Airflow, Tableau, Power BI, R, Stata, JIRA, Confluence

Business Analyst & Data Analyst

Cognizant

Sep 2022 - Aug 2023

- Authored comprehensive BRD, FRD, Source-to-Target Mappings (STM), SOPs, and test evidence, maintaining full traceability across design, build, and validation phases.
- Produced detailed data mappings from EDI 837/835, HL7, flat files, Oracle, and mainframe systems into curated analytical schemas, ensuring regulatory and financial accuracy.
- Developed scalable PySpark pipelines on Databricks and Amazon EMR, reducing batch processing windows by more than 50%.

- Designed optimized star schemas (claims, providers, procedures, payments) on Snowflake and Amazon Redshift, improving analytical query performance.
- Established PHI governance using Row-Level Security (RLS), masked views, and role-based access controls, passing HIPAA audits with zero critical findings.
- Authored complex SQL, T-SQL, and CTE-based queries to normalize codes, apply ICD/CPT mappings, and enforce payer rules.
- Coordinated clinician and business user validation during UAT, capturing defects, retest evidence, and formal sign-offs using Azure DevOps.

Tools & Technologies: R, Stata, SQL, Redshift, Snowflake, Spark, ADF, Glue, Tableau, Power BI, JIRA, Confluence

Business Analyst

Wipro, India

Jul 2021 - Aug 2022

- Collaborated with Risk, Fraud, and Compliance stakeholders to document business requirements, producing BRDs and FRDs with embedded regulatory and governance controls.
- Led conflict resolution on fraud and risk model thresholds by conducting impact assessments and publishing approval-ready decision memos.
- Built audit-ready lineage documentation aligned to NIST and PCI-DSS standards, achieving zero critical audit findings.
- Designed and implemented data lake architectures with raw and curated zones using AWS S3 and Hadoop, standardizing ingestion patterns.
- Developed fraud heatmaps, chargeback trend analyses, and operational dashboards using Tableau and Power BI, increasing fraud agent productivity by 15%.
- Instrumented monitoring and alerting with AWS CloudWatch and custom SQL checks, reducing mean-time-to-repair (MTTR) by 32%.

Tools & Technologies: SQL, R, Stata, Python, Spark, EMR, S3, Glue, Redshift, Tableau, Power BI, JIRA

EDUCATION

Master of Science in Information Systems and Technology

University of North Texas - Denton, TX | 2025
